Advanced Tell-tales

69 different Tell-tale parameters*

- ● ISO standard graphical symbol
- ● ISO standard graphical symbol - Mandatory truck only
- ● Non ISO standard graphical symbol - Squarell interpretation

*NOTE Availability is vehicle dependent

Advanced Tell-tales

It has been talked about for years, but now it is going to happen: a single system for up to 69 warnings about events in a vehicle, which can often also be seen on the dashboard. At this moment there are about 5 Tell-tale warnings available from the manufacturers. Because Squarell equipment also processes data in the vehicle, we have managed to generate over 30 Tell-tale warnings and pass them on as Squarell Advanced Tell-tales.

Possible implementation of the Advanced Tell-tales data.

For all EURO 6 trucks and buses

Squarell supports all EURO 6 trucks and buses and will continue to expand the list of supported vehicles in the future. If you are interested in support for a specific vehicle, Squarell is always open for a request.

Benefits of Advanced Tell-tales

- Expand the exciting amount of Tell-tales with up to 69 advanced parameters
- Monitor Tell-tales in your fleet management system
- Save costs with predictive maintenance
- Support for all EURO 6 trucks and buses
- Upgrade your existing Squarell hardware (OTA) with Advanced Tell-tales
